

ROOF MEASUREMENTS:
INCLUDE CONSIDERATIONS FOR ANY RIBS AND HEIGHT OF OVERHANGING SIDES. MEASURE FROM LONGEST AND WIDEST POINTS.

FRONT TO BACK:
SIDE TO SIDE:

NOTICE Because of the unique nature of most sail panels, please take the extra time to include extra measurements when returning your measurement sheet. The key area of concentration should be the front of the sails. Any curves or inward angles that might cause the loss of a potential sponsor need to be paid special attention to. If you have any questions regarding this, call us for additional directions.
